Custom Built Homes

MBCI can help build your custom home from underground up. Together we can plan, design and build your dream home.

Additions

MBCI can design or use your design to build any size of addition from a whole floor to a one room, any size, shape and design.

GARAGES

Add to your house any size of garage you desire. We can design it; build it to meet all city codes from underground up with your favorite exterior finish and color.

BASEMENTS

We provide the right design for your basement needs where it will be professionally finished because we believe a basement should be a comfortable place to enjoy a movie and a welcoming space to entertain. High quality renovations can be the best value for your renovation investment. A basement renovation can double the usable area of your home where you can add a bedroom, washroom, home-theatre, office, exercise room, kitchen, bathroom and a wet bar. All this will increase the value of your home.

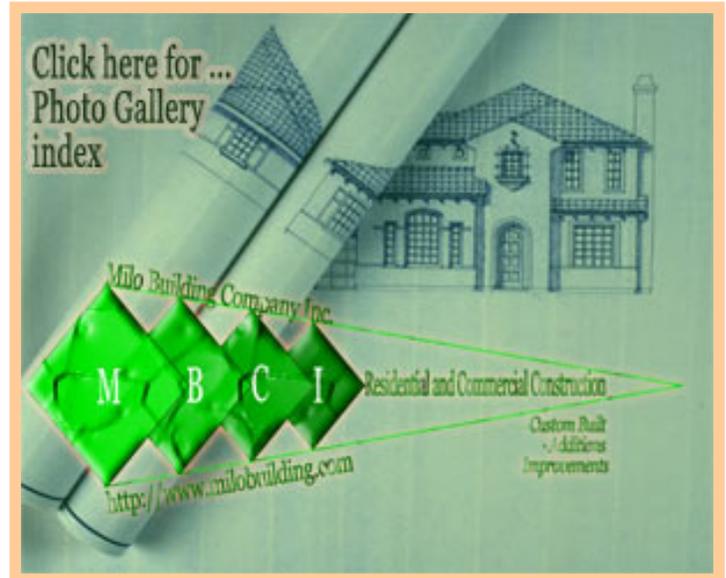

KITCHENS

Custom build kitchen to your needs. We design your kitchen according to your needs. Since kitchen is the place where there never seem to have enough space for everyone, we plan it carefully so it can meet the whole family needs and use. You can choose from our different custom made cabinet models or buy your own for us to install. We handle all installations, plumbing and electrical work, from start to finish and we ensure that they are professionally installed.

BATHROOMS

We can renovate and update your old bathroom to offer the best of modern conveniences. There are too many good ideas when it comes to renovate your bathroom, and there are a variety of flooring, lighting, cabinetry and plumbing fixtures to choose from.

Today's bath and kitchen market offers thousands of products for any renovation project. The question is, the availability, where to purchase it, and how to install it.

That's where we can come into the picture. We have the experience and resources for your needs where we can take you through the plan, offering options, and choices to match your design desires and budget.

DECKS AND PORCHES

MBCI Can custom build your deck to add a living space which is ideal for entertaining. Quality, dynamic and innovative woodwork. We can help with your deck plans and build it according to local city codes and zoning.
